Subject Index

Acetylcholinesterase inhibitors
Semisynthetic enzymes, Chemical modification, Catalytic activity, Fluorohydrolases, DFPases, Organophosphorofluoridate, Ribonuclease (RNase), Diimidates, 885
Acetyl xylan esterase
Lignin-carbohydrate complex, Enzyme hydrolysis, β-Mannanase, Xylanase, 90
Activity
Esterification, Lipase, Stability, Watermiscible organic solvent, 805
Activity toward p-nitrophenyl palmitate
Lipases, Esterases, Activity toward triolein, Activity toward tributyrin, 938
Activity toward tributyrin
Lipases, Esterases, Activity toward triolein, Activity toward p-nitrophenyl palmitate, 938
Activity toward triolein
Lipases, Esterases, Activity toward p-nitrophenyl palmitate, Activity toward tributyrin, 938
Adherent
Mammalian cells, Shear, Critical level, 209
Adsorption
Clostridium thermocellum, Endoglucanase, Cellulolytic enzyme, Hydrophobic interaction, 327
Lipase, Cellulose, Esterase activity, Circular dichroism, 748
Aerobic conditions
Saccharomyces cerevisiae, Enzymatic reduction,
Anaerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-methoxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol, 2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
Aerobic fermentation
Dextransucrase, production of, *Leuconostoc mesenteroides*, 665
Affinity chromatography
Affinity digestion, Cellulosome, Cellulase, *Clostridium thermocellum*, 289
Affinity digestion
Affinity chromatography, Cellulosome, Cellulase, *Clostridium thermocellum*, 289
Affinity partition
Aqueous two-phase systems, Hydroxypropyl cellulose, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Partition, Human erythrocyte, *Salmonella enteriditis*, Glucose-6-phosphate dehydrogenase, 785
Aggregation
PEG-enzymes, Organic media, Structural studies, 96
Agrobacterium rhizogenes
Bioreactors, Transformed roots, 13
Alcaligenes faecalis
D-Aminoacylase, D-amino acids, Enzyme immobilization, Optical resolution, 384
Alcohol dehydrogenase
Organosilicon compounds, Sila-substituted alcohols, Trimethylsilyl alcohols, β-effect by sila-substitution, 640
Alcohol fermentation
Silage, Polysaccharide hydrolysis, Sweet sorghum, Lactic acid fermentation, 923
Alcoholic fermentation
Proton pumping, Plasma membrane ATPase, Ethanol tolerance, *Kluyveromyces marxianus*, *Saccharomyces cerevisiae*, 23
Alcohol specificity
Lipase, Organic solvent, Enzyme selectivity, Competition, Principal Component Analysis, 966
Alcoholysis
Immobilized enzymes, Interesterification, Lipase, Monoglycerides, Operations stability, 959
Aldehyde binding site
Luciferase, *Vibrio harveyi*, Purification, Crystal, Inhibition, FMNH2 binding site, 479
Aldehyde reductase
See L-hexonate dehydrogenase, 690
Aldose reductase
Inhibitors of role in sorbitol pathway, Role in osmolality regulation, Role in diabetes pathology, Role in glucose metabolism, Catalyst of alcohol oxidation, Specificity of aldehyde reduction reactions of, Protein "superfamily" of, Oxidative modification of, Tight binding of $NADP^+$ to, Fluorescence assay of, Various sources of, Catalyst of prostaglandin PGH_2 reduction, Activation of, Secondary structure of, Homology to L-hexonate dehydrogenase, 690
Alginate gel stability
Alginate-immobilized lipase, Organic solvent, Two-phase system, Esterification, Transesterification, 42
Alginate-immobilized lipase
Organic solvent, Alginate gel stability, Two-phase system, Esterification, Transesterification, 42
Alkaline protease
Ammonium inhibition, Protease deactivation, 755
Alkalinophilic
Kurthia, Protease, Thermostable, 358
Alkalophilic bacteria
Pectinase, Xylanase, Degumming of ramie fibers, Ramie, *Boehmeria nivea*, 1013
Alkane hydroxylase
Alkanes, Alkanols, Bioconversion, Two-liquid-phase systems, *Pseudomonas putida*, 702
Alkane hydroxylase system
Recombinant *Escherichia coli*, Two-liquid-phase systems, Biooxidation of n-octane, Bioconversion, Octanoic acid, 931
Alkanes
Alkanols, Alkane hydroxylase, Bioconversion, Two-liquid-phase systems, *Pseudomonas putida*, 702
Alkanols
Alkanes, Alkane hydroxylase, Bioconversion, Two-liquid-phase systems, *Pseudomonas putida*, 702
Alpha-amylase
Thermomyces lanuginosus, Physicochemical properties, 112
α-Mannosidase
Enzymes in reverse, Synthesis of manno-oligosaccharides, 53
α-Amino-adipyl-cysteine (AC)
Cephalosporium acremonium, Cephalosporin C, Deacetylcephalosporin C, Deacetoxycephalosporin C, Penicillin N, α-amino-adipyl-cysteinyl-valine (ACV), 848
α-Amino-adipyl-cysteinyl-valine (ACV)
Cephalosporium acremonium, Cephalosporin C, Deacetylcephalosporin C, Deacetoxycephalosporin C, Penicillin N, α-amino-adipyl-cystein (AC), 848
α-Amylase
Fermentation, Industrial enzymes, Cheese whey, Enzyme production, 679
Thermostable, Immobilized, Continuous, *Bacillus*, 36
Ammonia stress
BHK cell line, Silicon tubing aeration, Lactate stress, Osmotic stress, On-line medium component monitoring, On-line LDH monitoring, On-line flow cytometry, 68
Ammonium inhibition
Alkaline protease, Protease deactivation, 755
Anaerobic conditions
Saccharomyces cerevisiae, Enzymatic reduction, Aerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-methoxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol, 2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
Anaerobic figures
Rumen cellulase, *Neocallimastix frontalis*, Crystalline cellulose, Cellulase complex, 258
Anaerobic metabolism
Clostridia, Fermentation, *C. acetobutylicum*, Solvent production, 277
Anaerobic sewage sludge
Heavy metals, *Thiobacillus* species, Sulfur-oxidizing bacteria, 376
Aqueous two-phase systems
Hydroxypropyl cellulose, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Partition, Affinity partition, Human erythrocyte, *Salmonella enteriditis*, Glucose-6-phosphate dehydrogenase, 785
Archaebacteria
Thermopsin, Thermostable protease, Expression, Thermophilic bacteria, Baculovirus expression, 696

© 1992 Butterworth–Heinemann

Aromatic aldehydes
Benzaldehyde, Vanillin, Natural flavors, Microbial production, 739
Arthrobacter simplex
Steroid Δ^1-dehydrogenation, Immobilized cells, Organic solvents, 619
Artificial rumen
Digestibility, Short chain fatty acids, Methane, Glycoside hydrolases, Hemicellulase, 284
Ashbya gossypii
Riboflavin, Volumetric oxygen transfer coefficient, Oxygen uptake rate, 984
Aspergillus niger
Packed-bed column bioreactor, Glucoamylase, Solid-state fermentation, 486
Polygalacturonase, Pectinesterase, Mutagenesis, Screening, 18
Assaying
Optimization, Monitoring, Hollow fiber bioreactor, 58
ATPase
Clostridium acetobutylicum, Motility, Product inhibition, 101
Aureobasidium pullulans
Phylloplane, Environmental pollution, Single-cell protein, Biodeterioration, 514

Bacillus
α-Amylase, Thermostable, Immobilized, Continuous, 36
Protease, Diffusion, Calcium alginate, *Serratia*, 586
Bacillus amylolquefaciens
Pectin, Pectic enzyme, Efficient secretion, 832
Bacillus subtilis
Thermostable cyclomaltodextrinases, High-temperature growth transformant, 194
Bacteria
Ethanol, Fermentation, Yeast, 350
Bacterial aerosol challenge
Off-gas filters, Testing, Evaluation, TBAC, Bioreactors, 553
Baculovirus expression
Thermopsin, Thermostable protease, Expression, Thermophilic bacteria, Archaebacteria, 696
Batch culture
Growth model, Plant cell, Cell cycle, 767
Batch reactor
Invertase, Immobilized yeasts, Immobilized biocatalyst, Sucrose hydrolysis, 221
β-Effect by sila-substitution
Alcohol dehydrogenase, Organosilicon compounds, Sila-substituted alcohols, Trimethylsilyl alcohols, 640
Benzaldehyde
Vanillin, Aromatic aldehydes, Natural flavors, Microbiol production, 739
Benzoxazolone-cephem derivatives
Semisynthetic cephalosporins, Penicillin amidase, Nucleophilic deacylation, Kinetically controlled enzyme synthesis, 496
β-Galactosidase
Organic solvents, Glucoamylase, Oligosaccharide synthesis, 528
β-Glucosidase
Mushroom, *Termitomyces clypeatus*, Protein secretion, Carbon catabolite repression, 144
β-Glucosidases
Clostridium thermocellum, 407
BHK cell line
Silicon tubing aeration, Lactate stress, Ammonia stress, Osmotic stress, On-line medium component monitoring, On-line LDH monitoring, On-line flow cytometry, 68
Bifunctional reagents
Protein stability, Chemical crosslinking, Crosslinking reagents, Enzyme activity, 866
Bioconversion
Alkanes, Alkanols, Alkane hydroxylase, Two-liquid-phase systems, *Pseudomonas putida*, 702
Recombinant *Escherichia coli*, Two-liquid-phase systems, Alkane hydroxylase system, Biooxidation of *n*-octane, Octanoic acid, 931
Biodeterioration
Aureobasidium pullulans, Phylloplane, Environmental pollution, Single-cell protein, 514
Biological denitrification
Drinking water, Microbiology, Nitrate removal, Stoichiometry, Bioreactor, Unit process, 170
Biological pitch control
Enzyme recovery, Lipase, Paper, Pitch, Pulp, Resins, 470
Biomass production
Pythium oligandrum, Nutrition, Environmental factors, Growth, Oospores, 106
Bioorganic synthesis
Enzymatic peptide synthesis, Organic media, Water activity, Chymotrypsin, 575
Biooxidation of *n*-octane
Recombinant *Escherichia coli*, Two-liquid-phase systems, Alkane hydroxylase system, Bioconversion, Octanoic acid, 931
Bioreactor
Biological denitrification, Drinking water, Microbiology, Nitrate removal, Stoichiometry, Unit process, 170
Bioreactors
Off-gas filters, Testing, Evaluation, Bacterial aerosol challenge, TBAC, 553
Transformed roots, *Agrobacterium rhizogenes*, 13
Biosensor
Fish freshness, H value, K value, Hypoxanthine ratio, Guanosine, Hypoxanthine, Inosine, Inosine-5′-monophosphate, 125
Biphasic system
Organic solvent, Spores, Methyl ketone, *Penicillium roquefortii*, 669
Biphasic systems
Enzymatic esterification, Organic solvents, Microaqueous systems, Micellar systems, Butyl butyrate, Lipase, *Mucor miehei*, 791
Bleaching
Xylanase, Mannanase, Cellulase, 272
β-Mannanase
Lignin-carbohydrate complex, Enzyme hydrolysis, Xylanase, Acetyl xylan esterase, 90
Boehmeria nivea
Alkalophilic bacteria, Pectinase, Xylanase, Degumming of ramie fibers, Ramie, 1013
Butyl butyrate
Enzymatic esterification, Organic solvents, Microaqueous systems, Biphasic systems, Micellar systems, Lipase, *Mucor miehei*, 791

Ca-alginate
Immobilization, Diffusion coefficients, 396
C. acetobutylicum
Clostridia, Fermentation, Solvent production, Anaerobic metabolism, 277
$CaCl_2$
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, Salt, NaCl, Inactivation, Stability, 214
Calcium
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Calcium alginate
Protease, Diffusion, *Bacillus*, *Serratia*, 586
Candida acidothermophilum
SSF, Vacuum cycling, Mixed enzyme, Substrate feeding, Relative volatility, Ethanol, 581
Candida rugosa
Lipase, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Carbocyclic nucleosides
Esterase, Lipase, Kinetic resolution, 911
Carbohydrate oxidases
Goal-oriented screening, Oxidases, Laccases, 898
Carbohydrate utilization
Clostridium thermocellum, Cellulase, Internal pH, Energetics, pH, 338
Carbon catabolite repression
β-Glucosidase, Mushroom, *Termitomyces clypeatus*, Protein secretion, 144
Carbon dioxide
Supercritical, Solubility, Lipase, Transesterification, 649
Catalytic activity
Semisynthetic enzymes, Chemical modification, Fluorohydrolases, DFPases, Organophosphorofluoridate, Ribonuclear (RNase), Diimidates, Acetylcholinesterase inhibitors, 885
Catechol 1,2-dioxygenase
Dissolved oxygen tension, *Pseudomonas putida*, 561
Cell cultivation
Mammalian cells, Macroporous microcarriers, Vesicular stomatitis, 203
Cell cycle
Growth model, Batch culture, Plant cycle, 767
Hybridoma, Continuous culture, Serum pH, 454

Cellobiohydrolase II
Core protein, Cellulose binding, Dispersion, Hydrolysis, *Trichoderma reesei*, 625
Cellular metabolic activity
IgG mRNA half-lives and levels, DNA synthesis rate, Specific IgG production rate, Hybridoma, 135
Cellulase
Affinity digestion, Affinity chromatography, Cellulosome, *Clostridium thermocellum*, 289
Bleaching, Xylanase, Mannanase, 272
Cellulase production, *Trichoderma reesei*, Whole wheat flour, Wheat hydrolyzate, 825
Clostridium thermocellum, Carbohydrate utilization, Internal pH, Energetics, pH, 338
Clostridium thermocellum, Cloning, Subcellulosome, Endoglucanase, 447
Myceliophthora (*Sporotrichum*) *thermophila*, Thermophilic fungi, 303
Cellulase complex
Rumen cellulase, Anaerobic fungus, *Neocallimastix frontalis*, Crystalline cellulose, 258
Cellulase production
Cellulase, *Trichoderma reesei*, Whole wheat flour, Wheat hydrolyzate, 825
Cellulolytic enzyme
Clostridium thermocellum, Endoglucanase, Adsorption, Hydrophobic interaction, 327
Cellulose
Lipase, Adsorption, Esterase activity, Circular dichroism, 748
Cellulose binding
Cellobiohydrolase II, Core protein, Dispersion, Hydrolysis, *Trichoderma reesei*, 625
Cellulosic membrane
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Cellulosome
Affinity digestion, Affinity chromatography, Cellulase, *Clostridium thermocellum*, 289
Cephalosporin C
Cephalosporium acremonium, Deacetylcephalosporin C, Deacetoxycephalosporin C, Penicillin N, α-amino-adipyl-cystein (AC), α-amino-adipyl-cysteinyl-valine (ACV), 848
Cephalosporium acremonium
Cephalosporin C, Deacetylcephalosporin C, Deacetoxycephalosporin C, Penicillin N, α-amino-adipyl-cystein (AC), α-amino-adipyl-cysteinyl-valine (ACV), 848
CGTase
α-Cyclodextrin, *Klebsiella oxygoca* 19-1, 1017
Champagne yeast
Settling, Kinetics, 762
Characterization
Chitinase, *Trichoderma harzianum*, Purification, 236
Cheese whey
α-Amylase, Fermentation, Industrial enzymes, Enzyme production, 679
Chemical crosslinking
Protein stability, Crosslinking reagents, Enzyme activity, Bifunctional reagents, 866
Chemical modification
Semisynthetic enzymes, Catalytic activity, Fluorohydrolases, DFPases, Organophosphorofluoridate, Ribonuclear (RNase), Diimidates, Acetylcholinesterase inhibitors, 885
Trypsin, Poly(ethylene glycol), 150
Chemical modification of proteins
Enzyme stabilization, Immobilization-stabilization of enzymes, Formaldehyde treatment of enzymes, 489
Chemostat
Diketogluconate, Enzyme induction, Dissolved oxygen tension, Dehydrogenases, 1001
Chitinase
Trichoderma harzianum, Purification, Characterization, 236
Chlorella vulgaris
Immobilization, Nitrogen, Phosphorus, *Scenedesmus bijugatus*, Soil algae, 656
Cholesterol
Flow injection, Fiber optic, Cholesterol oxidase, Cholesterol esterase, 313
Liposome, Microbial catalysis, *Rhodococcus*, 390
Mixed crystals, Hydrocortisone, Prednisolone, Microbial conversion, 462
Cholesterol esterase
Cholesterol, Flow injection, Fiber optic, Cholesterol oxidase, 313
Cholesterol oxidase
Cholesterol, Flow injection, Fiber optic, Cholesterol esterase, 313
Chymotrypsin
Enzymatic peptide synthesis, Bioorganic synthesis, Organic media, Water activity, 575
α-Chymotrypsin
Reverse micelles, Peptide synthesis, Optimization, 117
Circular dichroism
Lipase, Cellulose, Adsorption, Esterase activity, 748
Cloning
Clostridium thermocellum, Subcellulosome, Cellulase, Endoglucanase, 447
Clostridia
Fermentation, *C. acetobutylicum*, Solvent production, Anaerobic metabolism, 277
Clostridium acetobutylicum
Motility, Product inhibition, ATPase, 101
Clostridium thermocellum
Affinity digestion, Affinity chromatography, Cellulosome, Cellulase, 289
β-glucosidase, 407
Cellulase, Carbohydrate utilization, Internal pH, Energetics, pH, 338
Cloning, Subcellulosome, Cellulase, Endoglucanase, 447
Endoglucanase, Cellulolytic enzyme, Adsorption, Hydrophobic interaction, 327
Clostridium thermohydrosulfuricum
Ethanol fermentation, Molasses, 413
CMPA
MeCMPA, *Rhodococcus*, Enantioselective, Esterase, 893
Coal desulfurization
Continuous enrichment, 48
Coimmobilization
Magnetite, Glucose oxidase, Glucoamylase, Glycoenzymes oxidation, Crosslinking, Immobilization, 361
Colloidal gold
Electrochemical enzyme-linked immunoassay, Immunosensors, Toxic substances, 299
Competition
Lipase, Alcohol specificity, Organic solvent, Enzyme selectivity, Principal Component Analysis, 966
Continuous
α-Amylase, Thermostable, Immobilized, *Bacillus*, 36
Continuous culture
Hybridoma, Cell cycle, Serum pH, 454
Continuous enrichment
Coal desulfurization, 48
Continuous production
NAD^+ kinase, Immobilized, Silica-based support, $NADP^+$, 997
Core protein
Cellobiohydrolase II, Cellulose binding, Dispersion, Hydrolysis, *Trichoderma reesei*, 625
p-coumaroyl esterase
Phenolic acid esterase, Feruloyl esterase, *Pencillium pinophilum*, Solid-state fermentation, 875
Critical level
Mammalian cells, Adherent, Shear, 209
Crosslinking
Magnetite, Glucose oxidase, Glucoamylase, Glycoenzymes oxidation, Immobilization, Coimmobilization, 361
Crosslinking reagents
Protein stability, Chemical crosslinking, Enzyme activity, Bifunctional reagents, 866
Crystal
Luciferase, *Vibrio harveyi*, Purification, Inhibition, $FMNH_2$ binding site, Aldehyde binding site, 479
Crystalline cellulose
Rumen cellulase, Anaerobic fungus, *Neocallimastix frontalis*, Cellulase complex, 258
CSTR
Synthesis gas, Packed-column model, Liquid fuel, Gaseous fuel, 602
α-Cyclodextrin
CGTase, *Klebsiella oxygoca* 19-1, 1017

D-amino acids
D-Aminoacylase, *Alcaligenes faecalis*, Enzyme immobilization, Optical resolution, 384
D-Aminoacylase
Alcaligenes faecalis, D-amino acids, Enzyme immobilization, Optical resolution, 384
Deacetoxycephalosporin C
Cephalosporium acremonium, Cephalosporin C, Deacetylcephalosporin C, Penicillin N, α-amino-adipyl-cysteinyl (AC), α-amino-adipyl-cysteinyl-valine (ACV), 848

Deacetylcephalosporin C
Cephalosporium acremonium, Cephalosporin C, Deacetoxycephalosporin C, Penicillin N, α-amino-adipyl-cysteine (AC), α-amino-adipyl-cysteinyl-valine (ACV), 848
Deactivation constants
Soybean, α-galactosidase, Heat protection, Galactose, Model, 609
Degumming of ramie fibers
Alkalophilic bacteria, Pectinase, Xylanase, Ramie, *Boehmeria nivea*, 1013
Dehydrogenases
Chemostat, Diketogluconate, Enzyme induction, Dissolved oxygen tension, 1001
Dextransucrase, production of
Leuconostoc mesenteroides, Aerobic fermentation, 665
DFPases
Semisynthetic enzymes, Chemical modification, Catalytic activity, Fluorohydrolases, Organophosphorofluoridate, Ribonuclear (RNase), Diimidates, Acetylcholinesterase inhibitors, 885
Diffusion
Enzymes, Supercritical fluids, Proteins, Organic solvents, Mass transfer, 265
Immobilization, Mass transfer, Fermentation, 715
Protease, Calcium alginate, *Bacillus*, *Serratia*, 586
Diffusion coefficients
Immobilization, Ca-alginate, 396
Digestibility
Artificial rumen, Short chain fatty acids, Methane, Glycoside hydrolases, Hemicellulase, 284
Diimidates
Semisynthetic enzymes, Chemical modification, Catalytic activity, Fluorohydrolases, DFPases, Organophosphorofluoridate, Ribonuclease (RNase), Acetylcholinesterase inhibitors, 885
Diketogluconate
Chemostat, Enzyme induction, Dissolved oxygen tension, Dehydrogenases, 1001
Diol to lactos and lactane
Thromboxane antagonist, Stereoselective, Microbial oxidation, 778
Dispersion
Cellobiohydrolase II, Core protein, Cellulose binding, Hydrolysis, *Trichoderma reesei*, 625
Dissolved oxygen tension
Catechol 1,2-dioxygenase, *Pseudomonas putida*, 561
Chemostat, Diketogluconate, Enzyme induction, Dehydrogenases, 1001
DNA synthesis rate
IgG mRNA half-lives and levels, Cellular metabolic activity, Specific IgG production rate, Hybridoma, 135
Dough volume increase
Kinetics, Leavening, Microbial growth, Gas production, 141
Drinking water
Biological denitrification, Microbiology, Nitrate removal, Stoichiometry, Bioreactor, Unit process, 170
D-xylose metabolism
Pichia stipitis, D-xylulokinase, 975
D-xylulokinase
Pichia stipitis, D-xylose metabolism, 975

Efficient secretion
Pectin, Pectic enzyme, *Bacillus amylollquefaciens*, 832
Electrochemical enzyme-linked immunoassay
Immunosensors, Toxic substances, Colloidal gold, 299
Elicitation
Tagetes patula, Secondary Metabolites, Plant cell cultures, Hairy roots, Thiophenes, 2
Enantioselective
MeCMPA, *Rhodococcus*, CMPA, Esterase, 893
Enantioselectivity
Racemic methyl jasmonate, Hydrolysis, Enzymes, 954
Endoglucanase
Clostridium thermocellum, Cellulolytic enzyme, Adsorption, Hydrophobic interaction, 327
Clostridium thermocellum, Cloning, Subcellulosome, Cellulase, 447
Endoxylanases
Trichoderma reesei, Xylan hydrolysis, 566
Energetics
Clostridium thermocellum, Cellulase, Carbohydrate utilization, Internal pH, pH, 338
Enterobacteria
Piezoelectric, Immunosensor, Enterobacterial common antigen, 230
Enterobacterial common antigen
Piezoelectric, Immunosensor, Enterobacteria, 230
Environmental factors
Pythium oligandrum, Nutrition, Growth, Oospores, Biomass production, 106
Environmental pollution
Aureobasidium pullulans, Phylloplane, Single-cell protein, Biodeterioration, 514
Enzymatic esterification
Organic solvents, Microaqueous systems, Biphasic systems, Micellar systems, Butyl butyrate, Lipase, *Mucor miehei*, 791
Enzymatic peptide synthesis
Bioorganic synthesis, Organic media, Water activity, Chymotrypsin, 575
Enzymatic reduction
Saccharomyces cerevisiae, Aerobic conditions, Anaerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-methoxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol, 2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
Enzymatic transesterification
Geraniol, Lipase, Organic solvent, 293
Enzyme activity
Protein stability, Chemical crosslinking, Crosslinking reagents, Bifunctional reagents, 866
Enzyme hydrolysis
Lignin-carbohydrate complex, β-mannanase, Xylanase, Acetyl xylan esterase, 90
Enzyme immobilization
D-Aminoacylase, *Alcaligenes faecalis*, D-amino acids, Optical resolution, 384
Enzyme induction
Chemostat, Diketogluconate, Dissolved oxygen tension, Dehydrogenases, 1001
Enzyme modification
Peroxidase, Hydrophobicity, Organic solvent, 837
Enzyme production
α-Amylase, Fermentation, Industrial enzymes, Cheese whey, 679
Enzyme recovery
Biological pitch control, Lipase, Paper, Pitch, Pulp, Resins, 470
Enzyme selectivity
Lipase, Alcohol specificity, Organic solvent, Competition, Principal Component Analysis, 966
Enzyme stabilization
Immobilization-stabilization of enzymes, Formaldehyde treatment of enzymes, Chemical modification of proteins, 489
Enzymes
Lignin peroxidase, Pulp mill effluent, Lignin, *Phanerochaete chrysosporium*, 184
Racemic methyl jasmonate, Hydrolysis, Enantioselectivity, 954
Supercritical fluids, Proteins, Organic solvents, Diffusion, Mass transfer, 265
Enzymes in reverse
α-Mannosidase, Synthesis of mannooligosaccharides, 53
Epoxidation
Silicone polymer, Immobilized biocatalyst, Horse liver alcohol dehydrogenase, 371
Escherichia coli
Penicillin acylase, Whole cells, Permeabilization, Immobilization, Polyacrylamide gel, 161
Esterase
Carbocyclic nucleosides, Lipase, Kinetic resolution, 911
MeCMPA, *Rhodococcus*, CMPA, Enantioselective, 893
Esterase activity
Lipase, Cellulose, Adsorption, Circular dichroism, 748
Esterases
Lipases, Activity toward triolein, Activity toward *p*-nitrophenyl palmitate, Activity toward tributyrin, 938
Esterification
Alginate-immobilized lipase, Organic solvent, Alginate gel stability, Two-phase system, Transesterification, 42
Lipase, Stability, Water-miscible organic solvent, Activity, 805
Triolein, pNPP, Hydrolysis, Zymogram, 631
Esters
Lipase, Immobilized enzymes, Packed-bed reactor, Organic solvents, 904
Ester synthesis
Lipase, Peroxidation, Reflux trap, Water removal, 546
Ethanol
Bacteria, Fermentation, Yeast, 350
Mutagenesis, Xylose-fermenting yeast, Glucose and xylose fermentations, 644

SSF, Vacuum cycling, Mixed enzyme, *Candida acidothermophilum*, Substrate feeding, Relative volatility, 581
Ethanol fermentation
Molasses, *Clostridium thermohydrosulfuricum*, 413
Ethanol tolerance
Proton pumping, Plasma membrane ATPase, *Kluyveromyces marxianus*, *Saccharomyces cerevisiae*, Alcoholic fermentation, 23
Evaluation
Off-gas filters, Testing, Bacterial aerosol challenge, TBAC, Bioreactors, 553
Expression
Thermopsin, Thermostable protease, Thermophilic bacteria, Archaebacteria, *Baculovirus* expression, 696

Factorial design of experiments
Nutritional study, *Xanthomonas campestris*, Xanthan gum, 991
Factors affecting kinetics
Immobilized enzymes, Rate equations, 426
Fed-batch
r-pGH, Heat induction, Plasmid stability, High-density cultivation, 321
Fermentation
α-Amylase, Industrial enzymes, Cheese whey, Enzyme production, 679
Bacteria, Ethanol, Yeast, 350
Clostridia, *C. acetobutylicum*, Solvent production, Anaerobic metabolism, 277
Diffusion, Immobilization, Mass transfer, 715
Glycogen, Trehalose, Viability, Yeast, *Saccharomyces cerevisiae*, 64
Ferredoxin
Photoproduction, NADPH, FNR, 8
Feruloyl esterase
Phenolic acid esterase, *p*-coumaroyl esterase, *Pencillium pinophilum*, Solid-state fermentation, 875
Fiber optic
Cholesterol, Flow injection, Cholesterol oxidase, Cholesterol esterase, 313
Fish freshness
Biosensor, H value, K value, Hypoxanthine ratio, Guanosine, Hypoxanthine, Inosine, Inosine-5′-monophosphate, 125
Fixed-bed reactor
Immobilized yeast cells, Invertase, Sucrose hydrolysis, Pressure drop, Residence time distribution, 1007
Flax
Retting, Plant cell wall, Pectinolytic enzymes, 131
Flow injection
Cholesterol, Fiber optic, Cholesterol oxidase, Cholesterol esterase, 313
Fluorohydrolases
Semisynthetic enzymes, Chemical modification, Catalytic activity, DFPases, Organophosphorofluoridate, Ribonuclear (RNase), Diimidates, Acetylcholinesterase inhibitors, 885
$FMNH_2$ binding site
Luciferase, *Vibrio harveyi*, Purification, Crystal, Inhibition, Aldehyde binding site, 479
FNR
Photoproduction, NADPH, ferredoxin, 8

Formaldehyde treatment of enzymes
Enzyme stabilization, Immobilization-stabilization of enzymes, Chemical modification of proteins, 489
Fructose
Glucose isomerase, Glucose, Immobilization, High fructose syrup (HFS), 855

Galactose
Soybean, α-galactosidase, Heat protection, Deactivation constants, Model, 609
α-Galactosidase
Soybean, Heat protection, Deactivation constants, Galactose, Model, 609
Gaseous fuel
Synthesis gas, CSTR, Packed-column model, Liquid fuel, 602
Gas production
Kinetics, Leavening, Microbial growth, Dough volume increase, 141
Geraniol
Enzymatic transesterification, Lipase, Organic solvent, 293
Glucoamylase
Magnetite, Glucose oxidase, Glycoenzymes oxidation, Crosslinking, Immobilization, Coimmobilization, 361
Organic solvents, β-galactosidase, Oligosaccharide synthesis, 528
Packed-bed column bioreactor, *Aspergillus niger*, Solid-state fermentation, 486
Glucose
Glucose isomerase, Immobilization, Fructose, High fructose syrup (HFS), 855
Glucose-6-phosphate dehydrogenase
Aqueous two-phase systems, Hydroxypropyl cellulose, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Partition, Affinity partition, Human erythrocyte, *Salmonella enteriditis*, 785
NAD^+ regeneration, Modified electrode, Immobilized mediator, Phenazine methosulfate, 474
Glucose and xylose fermentations
Mutagenesis, Xylose-fermenting yeast, Ethanol, 644
Glucose isomerase
Glucose, immobilization, Fructose, High fructose syrup, 855
Glucose oxidase
Magnetite, Glucoamylase, Glycoenzymes oxidation, Crosslinking, Immobilization, Coimmobilization, 361
Glucose/xylose isomerase
Metal ion effect, Subunit dissociation, 317
Glycerophosphate oxidase preparation
Lactic acid bacteria, UV light mutagenesis, 917
Glycoenzymes oxidation
Magnetite, Glucose oxidase, Glucoamylase, Crosslinking, Immobilization, Coimmobilization, 361
Glycogen
Trehalose, Viability, Yeast, *Saccharomyces cerevisiae*, Fermentation, 64
Glycoside hydrolases
Artificial rumen, Digestibility, Short chain fatty acids, Methane, Hemicellulase, 284
Goal-oriented screening
Carbohydrate oxidases, Oxidases, Laccases, 898

Growth
Pythium oligandrum, Nutrition, Environmental factors, oospores, Biomass production, 106
Growth model
Batch culture, Plant cell, Cell cycle, 767
Guanosine
Biosensor, Fish freshness, H value, K value, Hypoxanthine ratio, Hypoxanthine, Inosine, Inosine-5′-monophosphate, 125

Hairy roots
Tagetes patula, Elicitation, Secondary metabolites, Plant cell cultures, Thiophenes, 2
4-Halo-3-oxobutanoic acid esters
Stereoselective, Microbial reduction, 731
Heat induction
r-pGH, Plasmid stability, Fed-batch, High-density cultivation, 321
Heat protection
Soybean, α-galactosidase, Deactivation constants, Galactose, Model, 609
Heavy metals
Anaerobic sewage sludge, *Thiobacillus* species, Sulfur-oxidizing bacteria, 376
Hemicellulase
Artificial rumen, Digestibility, Short chain fatty acids, Methane, Glycoside hydrolases, 284
L-hexonate dehydrogenase (aldehyde reductase), specificity of aldehyde reduction reactions of
Specific catalyst of oxidation of L-hexonates, reversibility of action, protein "superfamily" of, homology to aldose reductase, 690
High-density cultivation
r-pGH, Heat induction, Plasmid stability, Fed-batch, 321
High fructose syrup (HFS)
Glucose isomerase, Glucose, Immobilization, Fructose, 855
High-temperature growth transformant
Thermostable cyclomaltodextrinases, *Bacillus subtilis*, 194
Hollow fiber bioreactor
Optimization, Assaying, Monitoring, 58
Horse liver alcohol dehydrogenase
Silicone polymer, Immobilized biocatalyst, Epoxidation, 371
Human erythrocyte
Aqueous two-phase systems, Hydroxypropyl cellulose, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Partition, Affinity partition, *Salmonella enteriditis*, Glucose-6-phosphate dehydrogenase, 785
H value
Biosensor, Fish freshness, K value, Hypoxanthine ratio, Guanosine, Hypoxanthine, Inosine, Inosine-5′-monophosphate, 125
Hybridoma
Continuous culture, Cell cycle, Serum pH, 454
IgG mRNA half-lives and levels, Cellular metabolic activity, DNA synthesis rate, Specific IgG production rate, 135
Hybridomas
Pluronic F-68, Mechanical properties, Micromanipulation, 980

Hydrocortisone
Mixed crystals, Prednisolone, Cholesterol, Microbial conversion, 462
Hydrolysis
Cellobiohydrolase II, Core protein, Cellulose binding, Dispersion, *Trichoderma reesei*, 625
Lipase, Immobilization, Milkfat, 535
Racemic methyl jasmonate, Enantioselectivity, Enzymes, 954
Triolein, pNPP, Esterification, Zymogram, 631
Hydrophobic interaction
Clostridium thermocellum, Endoglucanase, Cellulolytic enzyme, Adsorption, 327
Hydrophobicity
Peroxidase, Enzyme modification, Organic solvent, 837
2-(4-Hydroxybenzyl)-1-cyclohexanol
Saccharomyces cerevisiae, Enzymatic reduction, Aerobic conditions, Anaerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-methoxybenzyl)-1-cyclohexanone,
2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
2-(4-Hydroxybenzyl)-1-cyclohexanone
Saccharomyces cerevisiae, Enzymatic reduction, Aerobic conditions, Anaerobic conditions, 2-(4-methoxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol,
2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
Hydroxypropyl cellulose
Aqueous two-phase systems, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Partition, Affinity partition, Human erythrocyte, *Salmonella enteriditis*, Glucose-6-phosphate dehydrogenase, 785
Hypoxanthine
Biosensor, Fish freshness, H value, K value, Hypoxanthine ratio, Guanosine, Inosine, Inosine-5′-monophosphate, 125
Hypoxanthine ratio
Biosensor, Fish freshness, H value, K value, Guanosine, Hypoxanthine, Inosine, Inosine-5′-monophosphate, 125

IgG mRNA half-lives and levels
Cellular metabolic activity, DNA synthesis rate, Specific IgG production rate, Hybridoma, 135
Immobilization
Ca-alginate, Diffusion coefficients, 396
Chlorella vulgaris, Nitrogen, Phosphorus, *Scenedesmus bijugatus*, Soil algae, 656
Diffusion, Mass transfer, Fermentation, 715
Escherichia coli, Penicillin acylase, Whole cells, Permeabilization, Polyacrylamide gel, 161
Glucose isomerase, Glucose, Fructose, High fructose syrup (HFS), 855
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Lipase, Milkfat, Hydrolysis, 535
Magnetite, Glucose oxidase, Glucoamylase, Glycoenzymes oxidation, Crosslinking, Coimmobilization, 361
Pseudomonas putida, Naphthalene hydroxylation, Organic solvents, 725
Immobilization-stabilization of enzymes
Enzyme stabilization, Formaldehyde treatment of enzymes, Chemical modification of proteins, 489
Immobilized
α-Amylase, Thermostable, Continuous, *Bacillus*, 36
NAD^+ kinase, Silica-based support, $NADP^+$ Continuous production, 997
Immobilized biocatalyst
Invertase, Immobilized yeasts, Sucrose hydrolysis, Batch reactor, 221
Silicone polymer, Horse liver alcohol dehydrogenase, Epoxidation, 371
Immobilized cells
Steroid Δ^1-dehydrogenation, *Arthrobacter simplex*, Organic solvents, 619
Immobilized enzyme
Membrane reactor, Kinetics, Mass transfer, 813
Immobilized enzymes
Alcoholysis, Interesterification, Lipase, Monoglycerides, Operations stability, 959
Lipase, Esters, Packed-bed reactor, Organic solvents, 904
Rate equations, Factors affecting kinetics, 426
Immobilized lipase
Transesterification, Organic solvent, *n*-hexane, Kinetic studies, Ping-pong bi-bi with inhibition, 709
Immobilized mediator
NAD^+ regeneration, Modified electrode, Glucose-6-phosphate dehydrogenase, Phenazine methosulfate, 474
Immobilized yeast cells
Invertase, Sucrose hydrolysis, Fixed-bed reactor, Pressure drop, Residence time distribution, 1007
Immobilized yeasts
Invertase, Immobilized biocatalyst, Sucrose hydrolysis, Batch reactor, 221
Immunosensor
Piezoelectric, Enterobacteria, Enterobacterial common antigen, 230
Immunosensors
Electrochemical enzyme-linked immunoassay, Toxic substances, Colloidal gold, 299
Inactivation
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Stability, 214
Industrial enzymes
α-Amylase, Fermentation, Cheese whey, Enzyme production, 679
Inhibition
Luciferase, *Vibrio harveyi*, Purification, Crystal, $FMNH_2$ binding site, Aldehyde binding site, 479
Inosine
Biosensor, Fish freshness, H value, K value, Hypoxanthine ratio, Guanosine, Hypoxanthine, Inosine-5′-monophosphate, 125
Inosine-5′-monophosphate
Biosensor, Fish freshness, H value, K value, Hypoxanthine ratio, Guanosine, Hypoxanthine, Inosine, 125
Insect cell culture
Oxygen, Recombinant protein, *Spodoptera frugiperda*, Scaleup, 798
Interesterification
Alcoholysis, Immobilized enzymes, Lipase, Monoglycerides, Operations stability, 959
Internal pH
Clostridium thermocellum, Cellulase, Carbohydrate utilization, Energetics, pH, 338
Invertase
Immobilized yeast cells, Sucrose hydrolysis, Fixed-bed reactor, Pressure drop, Residence time distribution, 1007
Immobilized yeasts, Immobilized biocatalyst, Sucrose hydrolysis, Batch reactor, 221

Kinetically controlled enzyme synthesis
Semisynthetic cephalosporins, Benzoxazolone-cephem derivatives, Penicillin amidase, Nucleophilic deacylation, 496
Kinetic resolution
Carbocyclic nucleosides, Esterase, Lipase, 911
Kinetics
Champagne yeast, Settling, 762
Immobilized enzyme, Membrane reactor, Mass transfer, 813
Leavening, Microbial growth, Gas production, Dough volume increase, 141
Lipase, *Candida rugosa*, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Kinetic studies
Immobilized lipase, Transesterification, Organic solvent, *n*-hexane, Ping-pong bi-bi with inhibition, 709
Klebsiella oxytoca 19-1
α-Cyclodextrin, CGTase, 1017
Kluyveromyces fragilis
Medium optimization, Statistical experimental design, Lactase production, 659
Kluyveromyces marxianus
Proton pumping, Plasma membrane ATPase, Ethanol tolerance, *Saccharomyces cerevisiae*, Alcoholic fermentation, 23
Kurthia
Alkalinophilic, Protease, Thermostable, 358
K value
Biosensor, Fish freshness, H value, Hypoxanthine ratio, Guanosine, Hypoxanthine, Inosine, Inosine-5′-monophosphate, 125

Labeled peptide inhibitor
Proteinase, Solid-phase proteinase assay, 819
Laccases
Goal-oriented screening, Carbohydrate oxidases, Oxidases, 898
Lactase production
Medium optimization, Statistical experimental design, *Kluyveromyces fragilis*, 659

Lactate stress
BHK cell line, Silicon tubing aeration, Ammonia stress, Osmotic stress, On-line medium component monitoring, On-line LDH monitoring, On-line flow cytometry, 68
Lactic acid bacteria
Glycerophosphate oxidase preparation, UV light mutagenesis, 917
Lactic acid fermentation
Silage, Polysaccharide hydrolysis, Sweet sorghum, Alcohol fermentation, 923
Lactobacillus casei
R-2-Hydroxy acid dehydrogenase, Substrate specificity, Stereospecificity, Synthetic application, Solvent tolerance, 28
Lactococcus lactis subsp. *lactis*
Protoplasts, Regeneration, Lysozyme, Mutanolysin, 156
Leavening
Kinetics, Microbial growth, Gas production, Dough volume increase, 141
Leuconostoc mesenteroides
Dextransucrase, production of, Aerobic fermentation, 665
Lignin
Lignin peroxidase, Enzymes, Pulp mill effluent, *Phanerochaete chrysosporium*, 184
Lignin-carbohydrate complex
Enzyme hydrolysis, β-mannanase, Xylanase, Acetyl xylan esterase, 90
Lignin peroxidase
Enzymes, Pulp mill effluent, Lignin, *Phanerochaete chrysosporium*, 184
Lipase
Alcohol specificity, Organic solvent, Enzyme selectivity, Competition, Principal Component Analysis, 966
Alcoholysis, Immobilized enzymes, Interesterification, Monoglycerides, Operations stability, 959
Biological pitch control, Enzyme recovery, Paper, Pitch, Pulp, Resins, 470
Candida rugosa, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Carbocyclic nucleosides, Esterase, Kinetic resolution, 911
Cellulose, Adsorption, Esterase activity, Circular dichroism, 748
Enzymatic esterification, Organic solvents, Microaqueous systems, Biphasic systems, Micellar systems, Butyl butyrate, *Mucor miehei*, 791
Enzymatic transesterification, Geraniol, Organic solvent, 293
Esterification, Stability, Water-miscible organic solvent, Activity, 805
Ester synthesis, Peroxidation, Reflux trap, Water removal, 546
Immobilization, Milkfat, Hydrolysis, 535
Immobilized enzymes, Esters, Packed-bed reactor, Organic solvents, 904
Penicillium, Production, Properties, 190
Supercritical, Carbon dioxide, Solubility, Transesterification, 649
Lipases
Esterases, Activity toward triolein, Activity toward *p*-nitrophenyl palmitate, Activity toward tributyrin, 938
Liposome
Microbial catalysis, *Rhodococcus*, Cholesterol, 390
Liquid fuel
Synthesis gas, CSTR, Packed-column model, Gaseous fuel, 602
Luciferase
Vibrio harveyi, Purification, Crystal, Inhibition, $FMNH_2$ binding site, Aldehyde binding site, 479
Lysozyme
Lactococcus lactis subsp. *lactis*, Protoplasts, Regeneration, Mutanolysin, 156
Lytic enzymes
Trichoderma longibrachiatum QM 9414, *Trichoderma harzianum* NCIM 1185, Protoplast, 241

Macroporous microcarriers
Mammalian cells, Cell cultivation, *Vesicular stomatitis*, 203
Magnetite
Glucose oxidase, Glucoamylase, Glycoenzymes oxidation, Crosslinking, Immobilization, Coimmobilization, 361
Mammalian cells
Adherent, Shear, Critical level, 209
Macroporous microcarriers, Cell cultivation, *Vesicular stomatitis*, 203
Mannanase
Bleaching, Xylanase, Cellulase, 272
Mass transfer
Diffusion, Immobilization, Fermentation, 715
Enzymes, Supercritical fluids, Proteins, Organic solvents, Diffusion, 265
Immobilized enzyme, Membrane reactor, Kinetics, 813
Mechanical properties
Pluronic F-68, Hybridomas, Micromanipulation, 980
MeCMPA
Rhodococcus, CMPA, Enantioselective, Esterase, 893
Medium optimization, 659
Statistical experimental design, Lactase production, *Kluyveromyces fragilis*, 659
Membrane reactor
Immobilized enzyme, Kinetics, Mass transfer, 813
Lipase, *Candida rugosa*, Kinetics, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Metal ion effect
Glucose/xylose isomerase, Subunit dissociation, 317
Methane
Artificial rumen, Digestibility, Short chain fatty acids, glycoside hydrolases, Hemicellulase, 284
2-(4-Methoxybenzyl)-1-cyclohexanone
Saccharomyces cerevisiae, Enzymatic reduction, Aerobic conditions, Anaerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol, 2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
2-(4-Methoxybenzyl)-1-cyclohexanol
Saccharomyces cerevisiae, Enzymatic reduction, Aerobic conditions, Anaerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-methoxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
Methyl ketone
Biphasic system, Organic solvent, Spores, *Penicillium roquefortii*, 669
Micellar systems
Enzymatic esterification, Organic solvents, Microaqueous systems, Biphasic systems, Butyl butyrate, Lipase, Mucor miehei, 791
Microaqueous systems
Enzymatic esterification, Organic solvents, Biphasic systems, Micellar systems, Butyl butyrate, Lipase, *Mucor miehei*, 791
Microbial catalysis
Liposome, *Rhodococcus*, Cholesterol, 390
Microbial conversion
Mixed crystals, Hydrocortisone, Prednisolone, Cholesterol, 462
Microbial growth
Kinetics, Leavening, gas production, Dough volume increase, 141
Microbial oxidation
Thromboxane antagonist, Stereoselective, Diol to lactos and lactane, 778
Microbial production
Benzaldehyde, Vanillin, Aromatic aldehydes, Natural flavors, 739
Microbial reduction
Stereoselective, 4-halo-3-oxobutanoic acid esters, 731
Microbiology
Biological denitrification, Drinking water, Nitrate removal, Stoichiometry, Bioreactor, Unit process, 170
Micromanipulation
Pluronic F-68, Mechanical properties, Hybridomas, 980
Milkfat
Lipase, Immobilization, Hydrolysis, 535
Mixed crystals
Hydrocortisone, Prednisolone, Cholesterol, Microbial conversion, 462
Mixed enzyme
SSF, Vacuum cycling, *Candida acidothermophilum*, Substrate feeding, Relative volatility, Ethanol, 581
Model
Soybean, α-galactosidase, Heat protection, Deactivation constants, Galactose, 609
Modified electrode
NAD^+ regeneration, Immobilized mediator, Glucose-6-phosphate dehydrogenase, Phenazine methosulfate, 474
Molasses
Ethanol fermentation, *Clostridium thermohydrosulfuricum*, 413
Mold suspension
Network structure, Rheological model, Surface chemistry, 944
Monitoring
Optimization, Assaying, Hollow fiber bioreactor, 58
Monoglycerides
Alcoholysis, Immobilized enzymes, Interesterification, Lipase, Operations stability, 959

Motility
Clostridium acetobutylicum, Product inhibition, ATPase, 101
Mucor miehei
Enzymatic esterification, Organic solvents, Microaqueous systems, Biphasic systems, Micellar systems, Butyl butyrate, Lipase, 791
Mushroom
β-Glucosidase, *Termitomyces clypeatus*, Protein secretion, Carbon catabolite repression, 144
Mutagenesis
Aspergillus niger, Polygalacturonase, Pectinesterase, Screening, 18
Xylose-fermenting yeast, Glucose and xylose fermentations, Ethanol, 644
Mutanolysin
Lactococcus lactis subsp. *lactis*, Protoplasts, Regeneration, Lysozyme, 156
Myceliophthora (Sporotrichum) thermophila
Thermophilic fungi, Cellulase, 303

NaCl
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, Inactivation, Stability, 214
NAD^+ kinase
Immobilized, Silica-based support, $NADP^+$, Continuous production, 997
NAD^+ regeneration
Modified electrode, Immobilized mediator, Glucose-6-phosphate dehydrogenase, Phenazine methosulfate, 474
$NADP^+$
NAD^+ kinase, Immobilized, Silica-based support, Continuous production, 997
NADPH
Photoproduction, FNR, ferredoxin, 8
Naphthalene hydroxylation
Pseudomonas putida, Immobilization, Organic solvents, 725
Natural flavors
Benzaldehyde, Vanillin, Aromatic aldehydes, Microbial production, 739
Neocallimastix frontalis
Rumen cellulase, Anaerobic fungus, Crystalline cellulose, Cellulase complex, 258
Network structure
Mold suspension, Rheological model, Surface chemistry, 944
n-hexane
Immobilized lipase, Transesterification, Organic solvent, Kinetic studies, Ping-pong bi-bi with inhibition, 709
Nitrate removal
Biological denitrification, Drinking water, Microbiology, Stoichiometry, Bioreactor, Unit process, 170
Nitrogen
Chlorella vulgaris, Immobilization, Phosphorus, *Scenedesmus bijugatus*, Soil algae, 656
Nucleophilic deacylation
Semisynthetic cephalosporins, Benzoxazolone-cephem derivatives, Penicillin amidase, Kinetically controlled enzyme synthesis, 496
Nutrition
Pythium oligandrum, Environmental factors, Growth, oospores, Biomass production, 106
Nutritional study
Xanthomonas campestris, Xanthan gum, Factorial design of experiments, 991

Octanoic acid
Recombinant *Escherichia coli*, Two-liquid-phase systems, Alkane hydroxylase system, Biooxidation of n-octane, Bioconversion, 931
Off-gas filters
Testing, Evaluation, Bacterial aerosol challenge, TBAC, Bioreactors, 553
Oligosaccharide synthesis
Organic solvents, Glucoamylase, β-galactosidase, 528
On-line cytometry
BHK cell line, Silicon tubing aeration, Lactate stress, Ammonia stress, Osmotic stress, On-line medium component monitoring, On-line LDH monitoring, 68
On-line LDH monitoring
BHK cell line, Silicon tubing aeration, Lactate stress, Ammonia stress, Osmotic stress, On-line medium component monitoring, On-line flow cytometry, 68
On-line medium component monitoring
BHK cell line, Silicon tubing aeration, Lactate stress, Ammonia stress, Osmotic stress, On-line LDH monitoring, On-line flow cytometry, 68
Oospores
Pythium oligandrum, Nutrition, Environmental factors, Growth, Biomass production, 106
Operational stability
Alcoholysis, Immobilized enzymes, Interesterification, Lipase, Monoglycerides, 959
Optical method
Proteinase assay, Protein adsorption, 614
Optical resolution
D-Aminoacylase, *Alcaligenes faecalis*, D-amino acids, Enzyme immobilization, 384
Optimization
α-Chymotrypsin, Reverse micelles, Peptide synthesis, 117
Assaying, Monitoring, Hollow fiber bioreactor, 58
Organic media
Enzymatic peptide synthesis, Bioorganic synthesis, Water activity, Chymotrypsin, 575
PEG-enzymes, Aggregation, Structural studies, 96
Organic solvent
Alginate-immobilized lipase, Alginate gel stability, Two-phase system, Esterification, Transesterification, 42
Biphasic system, Spores, Methyl ketone, *Penicillium roquefortii*, 669
Enzymatic transesterification, Geraniol, Lipase, 293
Immobilized lipase, Transesterification, *n*-hexane, Kinetic studies, Ping-pong bi-bi with inhibition, 709
Lipase, Alcohol specificity, Enzyme selectivity, Competition, Principal Component Analysis, 966
Peptide synthesis, Serine protease, Substrate specificity, 842
Peroxidase, Hydrophobicity, Enzyme modification, 837
Organic solvents
Enzymatic esterification, Microaqueous systems, Biphasic systems, Micellar systems, Butyl butyrate, Lipase, *Mucor miehei*, 791
Enzymes, Supercritical fluids, Proteins, Diffusion, Mass transfer, 265
Glucoamylase, β-galactosidase, Oligosaccharide synthesis, 528
Lipase, Immobilized enzymes, Esters, Packed-bed reactor, 904
Pseudomonas putida, Naphthalene hydroxylation, Immobilization, 725
Steroid Δ^1-dehydrogenation, Immobilized cells, *Arthrobacter simplex*, 619
Organophosphorofluoridate
Semisynthetic enzymes, Chemical modification, Catalytic activity, Fluorohydrolases, DFPases, Ribonuclear (RNase), Diimidates, Acetylcholinesterase inhibitors, 885
Organosilicon compounds
Alcohol dehydrogenase, Sila-substituted alcohols, Trimethylsilyl alcohols, β-effect by sila-substitution, 640
Osmotic stress
BHK cell line, Silicon tubing aeration, Lactate stress, Ammonia stress, On-line medium component monitoring, On-line LDH monitoring, On-line flow cytometry, 68
Oxidases
Goal-oriented screening, Carbohydrate oxidases, Laccases, 898
Oxygen
Recombinant protein, *Spodoptera frugiperda*, Insect cell culture, Scaleup, 798
Oxygen uptake rate
Riboflavin, *Ashbya gossypii*, Volumetric oxygen transfer coefficient, 984

Packed-bed column bioreactor
Glucoamylase, *Aspergillus niger*, Solid-state fermentation, 486
Packed-bed reactor
Lipase, Immobilized enzymes, Esters, Organic solvents, 904
Packed-column model
Synthesis gas, CSTR, Liquid fuel, Gaseous fuel, 602
Paper
Biological pitch control, Enzyme recovery, Lipase, Pitch, Pulp, Resins, 470
Partition
Aqueous two-phase systems, Hydroxypropyl cellulose, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Affinity partition, Human erythrocyte, *Salmonella enteriditis*, Glucose-6-phosphate dehydrogenase, 785
Pectic enzyme
Pectin, Efficient secretion, *Bacillus amylollquefaciens*, 832
Pectin
Pectic enzyme, Efficient secretion, *Bacillus amylollquefaciens*, 832

Pectinase
Alkalophilic bacteria, Xylanase, Degumming of ramie fibers, Ramie, *Boehmeria nivea*, 1013
Pectinesterase
Aspergillus niger, Polygalacturonase, Mutagenesis, Screening, 18
Pectinolytic enzymes
Flax, Retting, Plant cell wall, 131
PEG-enzymes
Aggregation, Organic media, Structural studies, 96
Penicillin acylase
Escherichia coli, Whole cells, Permeabilization, Immobilization, Polyacrylamide gel, 161
Penicillin amidase
Semisynthetic cephalosporins, Benzoxazolone-cephem derivatives, Nucleophilic deacylation, Kinetically controlled enzyme synthesis, 496
Penicillin N
Cephalosporium acremonium, Cephalosporin C, Deacetylcephalosporin C, Deacetoxycephalosporin C, α-amino-adipyl-cysteine (AC), α-amino-adipyl-cysteinyl-valine (ACV), 848
Penicillium
Lipase, Production, Properties, 190
Pencillium pinophilum
Phenolic acid esterase, Feruloyl esterase, p-coumaroyl esterase, Solid-state fermentation, 875
Penicillium roquefortii
Biphasic system, Organic solvent, Spores, Methyl ketone, 669
Peptide synthesis
α-Chymotrypsin, Reverse micelles, Optimization, 117
Serine protease, Substrate specificity, Organic solvent, 842
Permeabilization
Escherichia coli, Penicillin acylase, Whole cells, Immobilization, Polyacrylamide gel, 161
Peroxidase
Hydrophobicity, Enzyme modification, Organic solvent, 837
Peroxidation
Ester synthesis, Lipase, Reflux trap, Water removal, 546
pH
Clostridium thermocellum, Cellulase, Carbohydrate utilization, Internal pH, Energetics, 338
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Phanerochaete chrysosporium
Lignin peroxidase, Enzymes, Pulp mill effluent, Lignin, 184
Phenazine methosulfate
NAD^+ regeneration, Modified electrode, Immobilized mediator, Glucose-6-phosphate dehydrogenase, 474
Phenolic acid esterase
Feruloyl esterase, p-coumaroyl esterase, *Pencillium pinophilum*, Solid-state fermentation, 875
Phosphorus
Chlorella vulgaris, Immobilization, Nitrogen, *Scenedesmus bijugatus*, Soil algae, 656
Photoproduction
NADPH, FNR, Ferredoxin, 8
Phylloplane
Aureobasidium pullulans, Environmental pollution, Single-cell protein, Biodeterioration, 514
Physicochemical properties
Thermomyces lanuginosus, Alpha-amylase, 112
Pichia stipitis
D-xylulokinase, D-xylose metabolism, 975
Piezoelectric
Immunosensor, Enterobacteria, Enterobacterial common antigen, 230
Ping-pong bi-bi with inhibition
Immobilized lipase, Transesterification, Organic solvent, *n*-hexane, Kinetic studies, 709
Pitch
Biological pitch control, Enzyme recovery, Lipase, Paper, Pulp, Resins, 470
Plant cell
Growth model, Batch culture, Cell cycle, 767
Plant cell cultures
Tagetes patula, Elicitation, Secondary metabolites, Hairy roots, Thiophenes, 2
Plant cell wall
Flax, Retting, Pectinolytic enzymes, 131
Plasma membrane ATPase
Proton pumping, Ethanol tolerance, *Kluyveromyces marxianus*, *Saccharomyces cerevisiae*, Alcoholic fermentation, 23
Plasmid stability
r-pGH, Heat induction, Fed-batch, High-density cultivation, 321
Pluronic F-68
Mechanical properties, Hybridomas, Micromanipulation, 980
pNPP
Triolein, Hydrolysis, Esterification, Zymogram, 631
Polyacrylamide gel
Escherichia coli, Penicillin acylase, Whole cells, Permeabilization, Immobilization, 161
Poly(ethylene glycol)
Trypsin, Chemical modification, 150
Poly(ethylene glycol)-co-poly(propylene glycol) copolymer
Aqueous two-phase systems, Hydroxypropyl cellulose, Partition, Affinity partition, Human erythrocyte, *Salmonella enteriditis*, Glucose-6-phosphate dehydrogenase, 785
Polygalacturonase
Aspergillus niger, Pectinesterase, Mutagenesis, Screening, 18
Polysaccharide hydrolysis
Silage, Sweet sorghum, Lactic acid fermentation, Alcohol fermentation, 923
Prednisolone
Mixed crystals, Hydrocortisone, Cholesterol, Microbial conversion, 462
Pressure drop
Immobilized yeast cells, Invertase, Sucrose hydrolysis, Fixed-bed reactor, Residence time distribution, 1007
Principal Component Analysis
Lipase, Alcohol specificity, Organic solvent, Enzyme selectivity, Competition, 966
Product inhibition
Clostridium acetobutylicum, Motility, ATPase, 101
Production
Lipase, *Penicillium*, Properties, 190
Properties
Lipase, *Penicillium*, Production, 190
Prostaglandin PGF synthase, protein "superfamily" of
Homology to aldose reductase, homology to L-hexonate dehydrogenase, homology to rho-crystallin, 690
Protease
Diffusion, Calcium alginate, *Bacillus*, *Serratia*, 586
Kurthia, Alkalinophilic, Thermostable, 358
Protease deactivation
Alkaline protease, Ammonium inhibition, 755
Protein adsorption
Proteinase assay, Optical method, 614
Proteinase
Labeled peptide inhibitor, Solid-phase proteinase assay, 819
Proteinase assay
Protein adsorption, Optical method, 614
Proteins
Enzymes, Supercritical fluids, Organic solvents, Diffusion, Mass transfer, 265
Protein secretion
β-Glucosidase, Mushroom, *Termitomyces clypeatus*, Carbon catabolite repression, 144
Protein stability
Chemical crosslinking, Crosslinking reagents, Enzyme activity, Bifunctional reagents, 866
Proton pumping
Plasma membrane ATPase, Ethanol tolerance, *Kluyveromyces marxianus*, *Saccharomyces cerevisiae*, Alcoholic fermentation, 23
Protoplast
Trichoderma longibrachiatum QM 9414, *Trichoderma harzianum* NCIM 1185, Lytic enzymes, 241
Protoplasts
Lactococcus lactis subsp. *lactis*, Regeneration, Lysozyme, Mutanolysin, 156
Pseudomonas putida
Alkanes, Alkanols, Alkane hydroxylase, Bioconversion, Two-liquid-phase systems, 702
Catechol 1,2-dioxygenase, Dissolved oxygen tension, 561
Naphthalene hydroxylation, Immobilization, Organic solvents, 725
Pulp
Biological pitch control, Enzyme recovery, Lipase, Paper, Pitch, Resins, 470
Pulp mill effluent
Lignin peroxidase, Enzymes, Lignin, *Phanerochaete chrysosporium*, 184
Purification
Chitinase, *Trichoderma harzianum*, Characterization, 236
Luciferase, *Vibrio harveyi*, Crystal, Inhibition, $FMNH_2$ binding site, Aldehyde binding site, 479
Pythium oligandrum
Nutrition, Environmental factors, Growth, oospores, Biomass production, 106

R-2-Hydroxy acid dehydrogenase
Lactobacillus casei, Substrate specificity, Stereospecificity, Synthetic application, Solvent tolerance, 28
Racemic methyl jasmonate
Hydrolysis, Enantioselectivity, Enzymes, 954
Ramie
Alkalophilic bacteria, Pectinase, Xylanase, Degumming of ramie fibers, *Boehmeria nivea*, 1013
Rate equations
Immobilized enzymes, Factors affecting kinetics, 426
Recombinant *Escherichia coli*
Two-liquid-phase systems, Alkane hydroxylase system, Biooxidation of *n*-octane, Bioconversion, Octanoic acid, 931
Recombinant protein
Oxygen, *Spodoptera frugiperda*, Insect cell culture, Scaleup, 798
Reflux trap
Ester synthesis, Lipase, Peroxidation, Water removal, 546
Regeneration
Lactococcus lactis subsp. *lactis*, Protoplasts, Lysozyme, Mutanolysin, 156
Relative volatility
SSF, Vacuum cycling, Mixed enzyme, *Candida acidothermophilum*, Substrate feeding, Ethanol, 581
Residence time distribution
Immobilized yeast cells, Invertase, Sucrose hydrolysis, Fixed-bed reactor, Pressure drop, 1007
Resins
Biological pitch control, Enzyme recovery, Lipase, Paper, Pitch, Pulp, 470
Retting
Flax, Plant cell wall, Pectinolytic enzymes, 131
Reverse micelles
α-Chymotrypsin, Peptide synthesis, Optimization, 117
Rheological model
Mold suspension, Network structure, Surface chemistry, 944
Rho-crystallin, homology to aldose reductase
Homology to L-hexonate dehydrogenase, homology to prostaglandin PGF synthase, lens structural protein, 690
Rhodococcus
Liposome, Microbial catalysis, Cholesterol, 390
MeCMPA, CMPA, Enantioselective, Esterase, 893
Riboflavin
Ashbya gossypii, Volumetric oxygen transfer coefficient, Oxygen uptake rate, 984
Ribonuclease (RNase)
Semisynthetic enzymes, Chemical modification, Catalytic activity, Fluorohydrolases, DFPases, Organophosphorofluoridate, Diimidates, Acetylcholinesterase inhibitors, 885
r-pGH
Heat induction, Plasmid stability, Fed-batch, High-density cultivation, 321
Rumen cellulase
Anaerobic figures, *Neocallimastix frontalis*, Crystalline cellulose, Cellulase complex, 258
Saccharomyces cerevisiae
Enzymatic reduction, Aerobic conditions, Anaerobic conditions, 2-(4-hydroxybenzyl)-1-cyclohexanone, 2-(4-methoxybenzyl)-1-cyclohexanone, 2-(4-hydroxybenzyl)-1-cyclohexanol, 2-(4-methoxybenzyl)-1-cyclohexanol, Stereochemistry of reduction, Enantioselectivity of reduction, 197
Glycogen, Trehalose, Viability, Yeast, Fermentation, 64
Proton pumping, Plasma membrane ATPase, Ethanol tolerance, *Kluyveromyces marxianus*, Alcoholic fermentation, 23
Salmonella enteriditis
Aqueous two-phase systems, Hydroxypropyl cellulose, Poly(ethylene glycol)-co-poly(propylene glycol) copolymer, Partition, Affinity partition, Human erythrocyte, Glucose-6-phosphate dehydrogenase, 785
Salt
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, NaCl, Inactivation, Stability, 214
Scaleup
Oxygen, Recombinant protein, *Spodoptera frugiperda*, Insect cell culture, 798
Scenedesmus bijugatus
Chlorella vulgaris, Immobilization, Nitrogen, Phosphorus, Soil algae, 656
Screening
Aspergillus niger, Polygalacturonase, Pectinesterase, Mutagenesis, 18
Secondary metabolites
Tagetes patula, Elicitation, Plant cell cultures, Hairy roots, Thiophenes, 2
Semisynthetic cephalosporins
Benzoxazolone-cephem derivatives, Penicillin amidase, Nucleophilic deacylation, Kinetically controlled enzyme synthesis, 496
Semisynthetic enzymes
Chemical modification, Catalytic activity, Fluorohydrolases, DFPases, Organophosphorofluoridate, Ribonuclear (RNase), Diimidates, Acetylcholinesterase inhibitors, 885
Serine protease
Peptide synthesis, Substrate specificity, Organic solvent, 842
Serratia
Protease, Diffusion, Calcium alginate, *Bacillus*, 586
Serum pH
Hybridoma, Continuous culture, Cell cycle, 454
Settling
Champagne yeast, Kinetics, 762
Shear
Mammalian cells, Adherent, Critical level, 209
Short chain fatty acids
Artificial rumen, Digestibility, Methane, Glycoside hydrolases, Hemicellulase, 284
Silage
Polysaccharide hydrolysis, Sweet sorghum, Lactic acid fermentation, Alcohol fermentation, 923
Sila-substituted alcohols
Alcohol dehydrogenase, Organosilicon compounds, Trimethylsilyl alcohols, β-effect by sila-substitution, 640
Silica-based support
NAD^+ kinase, Immobilized, $NADP^+$, Continuous production, 997
Silicone polymer
Immobilized biocatalyst, Horse liver alcohol dehydrogenase, Epoxidation, 371
Silicon tubing aeration
BHK cell line, Lactate stress, Ammonia stress, Osmotic stress, On-line medium component monitoring, On-line LDH monitoring, On-line flow cytometry, 68
Single-cell protein
Aureobasidium pullulans, Phylloplane, Environmental pollution, Biodeterioration, 514
Soil algae
Chlorella vulgaris, Immobilization, Nitrogen, Phosphorus, *Scenedesmus bijugatus*, 656
Solid-phase proteinase assay
Proteinase, Labeled peptide inhibitor, 819
Solid-state fermentation
Packed-bed column bioreactor, Glucoamylase, *Aspergillus niger*, 486
Phenolic acid esterase, Feruloyl esterase, *p*-coumaroyl esterase, *Penicillium pinophilum*, 875
Solubility
Supercritical, Carbon dioxide, Lipase, Transesterification, 649
Solvent production
Clostridia, Fermentation, *C. acetobutylicum*, Anaerobic metabolism, 277
Solvent tolerance
R-2-Hydroxy acid dehydrogenase, *Lactobacillus casei*, Substrate specificity, Stereospecificity, Synthetic application, 28
Soybean
α-galactosidase, Heat protection, Deactivation constants, Galactose, Model, 609
Specific IgG production rate
IgG mRNA half-lives and levels, Cellular metabolic activity, DNA synthesis rate, Hybridoma, 135
Spodoptera frugiperda
Oxygen, Recombinant protein, Insect cell culture, Scaleup, 798
Spores
Biphasic system, Organic solvent, Methyl ketone, *Penicillium roquefortii*, 669
SSF
Vacuum cycling, Mixed enzyme, *Candida acidothermophilum*, Substrate feeding, Relative volatility, Ethanol, 581
Stability
Esterification, Lipase, Water-miscible organic solvent, Activity, 805
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Temperature, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, 214
Statistical experimental design
Medium optimization, Lactase production, *Kluyveromyces fragilis*, 659

Stereoselective
Microbial reduction, 4-halo-3-oxobutanoic acid esters, 731
Thromboxane antagonist, Microbial oxidation, Diol to lactos and lactane, 778
Stereospecificity
R-2-Hydroxy acid dehydrogenase, *Lactobacillus casei*, Substrate specificity, Synthetic application, Solvent tolerance, 28
Steroid Δ^1-dehydrogenation
Immobilized cells, *Arthrobacter simplex*, Organic solvents, 619
Stoichiometry
Biological denitrification, Drinking water, Microbiology, Nitrate removal, Bioreactor, Unit process, 170
Structural studies
PEG-enzymes, Aggregation, Organic media, 96
Subcellulosome
Clostridium thermocellum, Cloning, Cellulase, Endoglucanase, 447
Substrate feeding
SSF, Vacuum cycling, Mixed enzyme, *Candida acidothermophilum*, Relative volatility, Ethanol, 581
Substrate specificity
Peptide synthesis, Serine protease, Organic solvent, 842
R-2-Hydroxy acid dehydrogenase, *Lactobacillus casei*, Stereospecificity, Synthetic application, Solvent tolerance, 28
Subunit dissociation
Glucose/xylose isomerase, Metal ion effect, 317
Sucrose hydrolysis
Immobilized yeast cells, Invertase, Fixed-bed reactor, Pressure drop, Residence time distribution, 1007
Invertase, Immobilized yeasts, Immobilized biocatalyst, Batch reactor, 221
Sulfur-oxidizing bacteria
Heavy metals, Anaerobic sewage sludge, *Thiobacillus* species, 376
Supercritical
Carbon dioxide, Solubility, Lipase, Transesterification, 649
Supercritical fluids
Enzymes, Proteins, Organic solvents, Diffusion, Mass transfer, 265
Surface chemistry
Mold suspension, Network structure, Rheological model, 944
Sweet sorghum
Silage, Polysaccharide hydrolysis, Lactic acid fermentation, Alcohol fermentation, 923
Synthesis gas
CSTR, Packed-column model, Liquid fuel, Gaseous fuel, 602
Synthesis of manno-oligosaccharides
α-Mannosidase, Enzymes in reverse, 53
Synthetic application
R-2-Hydroxy acid dehydrogenase, *Lactobacillus casei*, Substrate specificity, Stereospecificity, Solvent tolerance, 28

Tagetes patula
Elicitation, Secondary Metabolites, Plant cell cultures, Hairy roots, Thiophenes, 2

TBAC
Off-gas filters, Testing, Evaluation, Bacterial aerosol challenge, Bioreactors, 553
Temperature
Lipase, *Candida rugosa*, Kinetics, Membrane reactor, Cellulosic membrane, Immobilization, pH, Calcium, $CaCl_2$, Salt, NaCl, Inactivation, Stability, 214
Termitomyces clypeatus
β-Glucosidase, Mushroom, Protein secretion, Carbon catabolite repression, 144
Testing
Off-gas filters, Evaluation, Bacterial aerosol challenge, TBAC, Bioreactors, 553
Thermomyces lanuginosus
Alpha-amylase, Physicochemical properties, 112
Thermophilic bacteria
Thermopsin, Thermostable protease, Expression, Archaebacteria, Baculovirus expression, 696
Thermophilic fungi
Myceliophthora (Sporotrichum) thermophila, Cellulase, 303
Thermopsin
Thermostable protease, Expression, Thermophilic bacteria, Archaebacteria, Baculovirus expression, 696
Thermostable
α-Amylase, Immobilized, Continuous, *Bacillus*, 36
Kurthia, Alkalinophilic, Protease, 358
Thermostable cyclomaltodextrinases
Bacillus subtilis, High-temperature growth transformant, 194
Thermostable protease
Thermopsin, Expression, Thermophilic bacteria, Archaebacteria, Baculovirus expression, 696
Thiobacillus species
Heavy metals, Anaerobic sewage sludge, Sulfur-oxidizing bacteria, 376
Thiophenes
Tagetes patula, Elicitation, Secondary metabolites, Plant cell cultures, Hairy roots, 2
Thromboxane antagonist
Stereoselective, Microbial oxidation, Diol to lactos and lactane, 778
Toxic substances
Electrochemical enzyme-linked immunoassay, Immunosensors, Colloidal gold, 299
Transesterification
Immobilized lipase, Organic solvent, *n*-hexane, Kinetic studies, Ping-pong bi-bi with inhibition, 709
Supercritical, Carbon dioxide, Solubility, Lipase, 649
Transformed roots
Bioreactors, *Agrobacterium rhizogenes*, 13
Trehalose
Glycogen, Viability, Yeast, *Saccharomyces cerevisiae*, Fermentation, 64
Trichoderma harzianum
Chitinase, Purification, Characterization, 236
Trichoderma harzianum NCIM 1185
Trichoderma longibrachiatum QM 9414, Lytic enzymes, Protoplast, 241
Trichoderma longibrachiatum QM 9414
Trichoderma harzianum NCIM 1185, Lytic enzymes, Protoplast, 241
Trichoderma reesei
Cellobiohydrolase II, Core protein, Cellulose binding, Dispersion, Hydrolysis, 625
Cellulase, Cellulase production, Whole wheat flour, Wheat hydrolyzate, 825
Endoxylanases, Xylan hydrolysis, 566
Trimethylsilyl alcohols
Alcohol dehydrogenase, Organosilicon compounds, Sila-substituted alcohols, β-effect by sila-substitution, 640
Triolein
pNPP, Hydrolysis, Esterification, Zymogram, 631
Trypsin
Poly(ethylene glycol), Chemical modification, 150
Two-liquid-phase system
Recombinant *Escherichia coli*, Alkane hydroxylase system, Biooxidation of *n*-octane, Bioconversion, Octanoic acid, 931
Two-liquid-phase systems
Alkanes, Alkanols, Alkane hydroxylase, Bioconversion, *Pseudomonas putida*, 702
Two-phase system
Alginate-immobilized lipase, Organic solvent, Alginate gel stability, Esterification, Transesterification, 42

Unit process
Biological denitrification, Drinking water, Microbiology, Nitrate removal, Stoichiometry, Bioreactor, 170
UV light mutagenesis
Glycerophosphate oxidase preparation, Lactic acid bacteria, 917

Vacuum cycling
SSF, Mixed enzyme, *Candida acidothermophilum*, Substrate feeding, Relative volatility, Ethanol, 581
Vanillin
Benzaldehyde, Aromatic aldehydes, Natural flavors, Microbial production, 739
Vesicular stomatitis virus
Mammalian cells, Macroporous microcarriers, Cell cultivation, 203
Viability
Glycogen, Trehalose, Yeast, *Saccharomyces cerevisiae*, Fermentation, 64
Vibrio harveyi
Luciferase, Purification, Crystal, Inhibition, $FMNH_2$ binding site, Aldehyde binding site, 479
Volumetric oxygen transfer coefficient
Riboflavin, *Ashbya gossypii*, Oxygen uptake rate, 984

Water activity
Enzymatic peptide synthesis, Bioorganic synthesis, Organic media, Chymotrypsin, 575
Water-miscible organic solvent
Esterification, Lipase, Stability, Activity, 805
Water removal
Ester synthesis, Lipase, Peroxidation, Reflux trap, 546

Wheat hydrolyzate
Cellulase, Cellulase production, *Trichoderma reesei*, Whole wheat flour, 825
Whole cells
Escherichia coli, Penicillin acylase, Permeabilization, Immobilization, Polyacrylamide gel, 161
Whole wheat flour
Cellulase, Cellulase production, *Trichoderma reesei*, Wheat hydrolyzate, 825

Xanthan gum
Nutritional study, *Xanthomonas campestris*, Factorial design of experiments, 991

Xanthomonas campestris
Nutritional study, Xanthan gum, Factorial design of experiments, 991

Xylanase
Alkalophilic bacteria, Pectinase, Degumming of ramie fibers, Ramie, *Boehmeria nivea*, 1013
Bleaching, Mannanase, Cellulase, 272
Lignin-carbohydrate complex, Enzyme hydrolysis, β-mannanase, Acetyl xylan esterase, 90

Xylan hydrolysis
Endoxylanases, *Trichoderma reesei*, 566

Xylose-fermenting yeast
Mutagenesis, Glucose and xylose fermentations, Ethanol, 644

Yeast
Bacteria, Ethanol, Fermentation, 350
Glycogen, Trehalose, Viability, *Saccharomyces cerevisiae*, Fermentation, 64

Zymogram
Triolein, pNPP, Hydrolysis, Esterification, 631
